

## Security Questions and Password Change

1. In the upper-right, click on the **User Preferences** button to open the **Preferences** window.
2. In the **Preferences** window, select the **Security Information** option.
3. In the **Security Information** window, you'll be able to set security questions and answers.
4. Set and save your security answers.

*\*Note you will not be able to recover your password on failed log-in attempts without answers to the selected security questions.*

You can also change your current password here as well.

**Setup Security Information**

Please enter the answers to Security Questions for restoring the password in the form. You may also change your password.
