

CompuMed Exam Website

Uploading a Study using Software

1. Insert exam CD/DVD into your disc drive. Disregard the autoplay window if/when it appears.
2. Open the upload software, BritTransfer, from your Desktop or Start Menu.

*After install, the software launcher is usually in the Start Menu (Windows key).
You may then drag a shortcut to your Desktop.*

3. With the app opened, confirm the [Server] information matches the image below.

Enter your [User ID] and [Password] before uploading. Set the [Select Folder] field to [D:\]

4. Click [Save Settings] to save all settings except password.

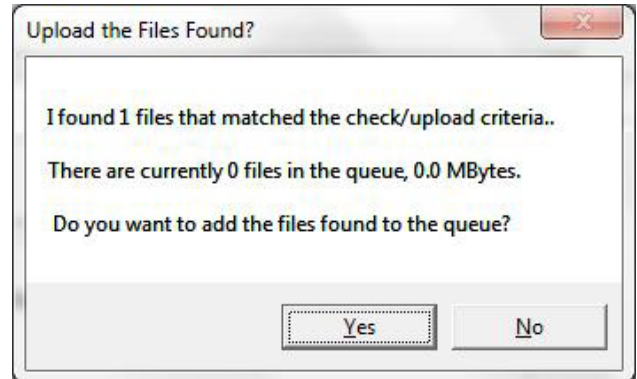

The screenshot shows the BritTransfer Version 1.0.0 settings window. The 'Settings' section contains four input fields: 'Server' with the value 'global.brit.com', 'User ID' with 'username', 'Password' with a masked field of asterisks, and 'Select folder' with 'D:\'. To the right of these fields are four buttons: 'Save Settings', 'Use Defaults', 'Advanced Settings', and 'Check/Send Files'. Below the settings is an 'Activity' section with a text box containing 'Nothing has been sent yet..'. At the bottom of the window are four buttons: 'Help', 'Clear All Queues', 'Retry Failed', and 'Cancel'.

**If you experience problems uploading, confirm the server field matches the image above.*

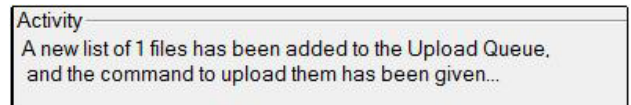

**If you are using a flash drive or other media, change the [Select Folder] by clicking the folder icon.*

5. Click [Check/Send File] to start the upload.

- The app will scan for any DICOM files and prepare them for upload. A window will appear, click **[Yes]** to start uploading (this scan can take a few minutes depending on study size).

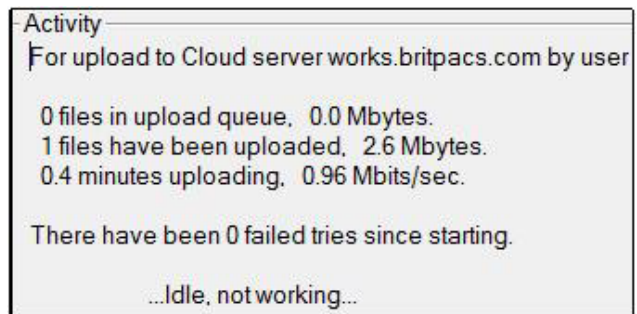

- The **[Activity]** window will give you periodic updates on the upload status.

- See the **[Activity]** window for information about the number of files in the queue for uploading, successfully uploads, upload speeds and failed attempts.

[...idle, not working...] indicates there are currently no images to upload. Ready to upload.

- You have the option to clear any queued studies and retry any failed upload attempts.

- Once an upload is complete, you may close the program.
